## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 11-18, drawn to soluble CTLA4 mutant molecules, soluble CTLA4 mutant fusion molecule, nucleic acid encoding the soluble CTLA4 mutant and method of producing the mutant molecule, classified in class 435, subclass 69.1.
  - II. Claims 19-22, drawn to a method of regulating functional CTLA4 positive Tcell interactions with CD 80 and CD86 positive cells, classified in class 435, subclass 343.2.
  - III. Claims 23-25, drawn to a method for treating immune system diseases, classified in class 514, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and each of inventions II-III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the nucleic acid can be used for the production of the protein, and the protein can be used in another process, like the production of antibodies.

Art Unit: 1646

Inventions II-III are independent and distinct, as the methods use different reagents and different steps to reach different goals.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, and because the searches required for each of the groups are different, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eliane Lazar-Wesley, PhD, whose telephone number is (703) 305 4059. The examiner can normally be reached on Monday-Friday from 9:30am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, can be reached on (703) 308-6564.

Official papers filed by fax should be directed to (703) 308 4242. Faxed draft or informal communications with the examiner should be directed to (703) 308-0294.
